Tumkur, Karnataka

PROFESSIONAL OBJECTIVE

Aspiring Cybersecurity Engineer with a solid foundation in information security principles, network security, and risk management. Eager to gain hands-on experience in threat analysis, vulnerability assessment, and incident response. Strong commitment to protecting systems, networks, and data from potential threats.

EDUCATION

Sri Siddhartha Institute Of Technology Jul 2023 -Jun 2027

Bachelor's of Engineering in Computer Science and Engineering (Cybersecurity) TUMKUR

8.67 CGPA (6th Sem)

Courses: Python Programming, Data Structures & Algorithms, Cybersecurity, Database Management Systems, Operating Systems, IoT, Computer Networks.

BGS Gurukula Independent PU College

Percentage : 78 Jul 2021-Apr 2023

Physics , Chemistry , Maths , Biology TUMKUR

SKILLS

- **Programming Languages:** Python
- **Technical Skills:** Vulnerability Assessment, Basic Cryptography, Windows/Linux (Kali, Ubuntu)
- **Tools & Platforms:** Kali Linux, Wireshark, Nmap, Burp Suite, Metasploit Framework

EXPERIENCE Cybersecurity Lab Practice

- Gained hands-on experience with tools like Kali Linux, Nmap, and Burp Suite
- Practiced ethical hacking techniques in controlled lab environments
- Performed vulnerability scanning and basic exploitation tasks

Cybersecurity CTF Participant

- Participated in Capture The Flag challenges focused on web security, cryptography, and networking
- Solved real-world security problems involving vulnerability exploitation.

PROJECTS IoT Security Project :

Hand Gesture Vocalizer

Participated in an Internet of Things (IoT) based project focused on building and securing connected devices among multiple teams for innovation and execution.

Presented the project at Vidya Vikas Institute of Engineering and Technology, Mysuru during the State-Level Project Exhibition – 2025 on 12th May 2025 .

MINI project (ongoing) :

Dynamic Zero-Trust security Architecture with real-time access verification and adaptive policy Enforcement

A dynamic Zero-Trust security architecture continuously verifies every user, device, and request in real time before granting access, rather than trusting anything by default. It adapts security policies based on context (like behaviour, location, and risk level) to enforce strict, intelligent access control at all times.

CERTIFICATIONS

- TNS India Foundation - Certified in Java, Soft skills
- Bootcamp on Machine Learning for Cybersecurity (Oct 2025)
- Identity and Access Management (IAM) (Sep 2025)
- Inter-college CTF Competition "XPLOIT: Flag Heist" (Mar 2026)
- “IOT Application using Arduino and Raspberry Pi” on 23rd,24th,25th DEC 2024
- Resume Building workshop and Mock Placement Drive on 3rd March 2026
